## SUMMARY

- BCA graduate (**CGPA: 9.24/10**) with hands-on experience in data analysis using Python, SQL, Excel, and Power BI. Skilled in exploratory data analysis, statistical analysis, and validating large, multi-source datasets to ensure data quality and accuracy. Build Power BI dashboards, automate recurring reports, and translate findings into actionable business insights. Published a literature review synthesizing 130+ sources on Generative AI in healthcare. Collaborate with cross-functional teams to support data-driven decisions and process improvement.

## SKILLS

- **Programming & Data Analysis:** Python (Pandas, NumPy), SQL, Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning, Data Validation, Data Quality, Data Modeling
- **Business Intelligence & Visualization:** Power BI, DAX, Power Query, Dashboard Development, Data Visualization, Business Reporting
- **Excel & Reporting:** Microsoft Excel (Pivot Tables, XLOOKUP, INDEX-MATCH), Reporting Automation
- **Databases:** SQLite, Relational Databases, Database Management
- **Tools:** Git, GitHub
- **Business Skills:** Business Communication, Cross-Functional Collaboration, Documentation, Problem Solving, Critical Thinking, Process Improvement

## EDUCATION

**Aditya Institute of Management Studies & Research**

*Bachelor of Computer Applications (BCA)*

Graduated: 2026

*CGPA: 9.24/10*

**Dr. N.S.A.M. PU College, Bengaluru**

*12th Grade*

2021 – 2023

*89.91%*

## EXPERIENCE

**Data Analytics Intern**

Feb 2026 – Jun 2026

*Anudip Foundation, Bengaluru*

- Analyzed and validated 10,000+ row multi-source datasets using SQL and Python to support accurate business reporting.
- Performed exploratory data analysis to identify trends, patterns, and anomalies, translating findings into actionable business insights.
- Built Power BI dashboards and automated recurring reporting workflows using Power Query and DAX.
- Presented data-driven insights to cross-functional teams and translated technical findings into business recommendations.

## PROJECTS

**Rapido Ride Analytics Dashboard**

May 2026

- Analyzed a 100K+ record, multi-source dataset using Python and exploratory data analysis to identify booking trends and peak-hour demand patterns.
- Built an interactive Power BI dashboard using DAX to visualize trends and support data-driven decision-making; tracked project work using Git.
- Translated raw ride data into actionable business insights to support operational planning.

**Technologies:** Python, EDA, Power BI, DAX, Git

**Smart Attendance Management System (SAMS)**

May 2026

- Automated attendance-related data processing to reduce manual tracking effort.
- Delivered a working solution tested with a **20-user** pilot group. **Technologies:** Python, FastAPI, SQLite

## CERTIFICATIONS

**Cisco** – Data Analytics Essentials (2026) | **Simplilearn** – Business Analytics with Excel (2025)

**Deloitte (Forage)** – Data Analytics Job Simulation (2025) | **Infosys** – Data Science (2025)

**HP LIFE** – Data Science & Analytics (2025) | **Google** – AI Essentials (2025)

## PUBLICATION

- *Generative AI in Healthcare: Bridging Clinical Innovation and Organizational Efficiency* – **IJIRT, 2025 (Co-Author)**.  
Literature review synthesizing 130+ sources on Generative AI applications in healthcare.
